

ASSEMBLY INSTRUCTIONS

OZARK TRAIL®
OUTDOOR EQUIPMENT

MODEL W418.1A SUN SHELTER 8' X 6'

IMPORTANT: WE ADVISE YOU TO ASSEMBLE THE SHADE CANOPY ONCE BEFORE USE TO BECOME FAMILIAR WITH THE ASSEMBLY

NOTE: PLEASE LOOK AT THE REPLACEMENT PARTS DIAGRAM TO SEE HOW YOUR FRAME IS ASSEMBLED.

STEP 1: Spread canopy out flat with the pole sleeves up.

STEP 2: Extend the fiberglass frame poles by pulling out each section and placing it into the metal connectors. You will have two fiberglass poles (A).

STEP 3: Slide each fiberglass pole (A) through the sleeves on the top of the canopy roof. Position poles so that equal pole lengths extend on either side of pole sleeves.

STEP 4: Starting at the back corners of the shelter, place ends of the fiberglass frame pole that runs across the front of the canopy roof onto the pins located at the back of the canopy, by gently flexing the pole upward into an arch. Repeat the same procedure at the front corners of the canopy with the pole that runs across the back of the canopy roof.

STEP 5: Clip the plastic hooks attached to the canopy walls to the poles.

STEP 6: Where the poles cross there are fabric ties, tie them around both poles to hold them together.

Canopy should appear as shown.

STEP 7: Stake down canopy by inserting stakes through the pin ring at each corner of the canopy. Hammer stakes into ground at a 45° angle, by using a hammer or mallet. Make sure to use strap to pull canopy out even and tight. Sandbags are provided

for use at the beach. Fill the bags with sand to hold the canopy in place.

NOTE: To take down the canopy, follow steps above in the reverse order. Place stakes into stake bag and poles into pole bag, which are provided. The Canopy should be folded into equal parts toward the center to distribute the bulk. Start a small tight roll, the width of your carry bag. Once rolled, tie a string or rope around canopy to hold it in place. Place canopy and stake bag into carry bag. **MAKE SURE IT IS CLEAN AND DRY BEFORE STORING.**
